NOTES:
1) Reference designations "WP" are wire pads.
2) Pigtails with lugs from WP17 and WP18 connect to the chassis plate assembly.
3) R2, 0.0 ohms, is the secondary ground to chassis connection.
4) WP15 and WP16 daisy-chain secondary ground between modules.
5) This schematic is common to all positive voltage Modules. See the chart below for the Module Ref. Designation and DC-DC Converter P/N.
6) R1, R3, C5 and C6 shown for reference only - DO NOT INSTALL.
7) COM1-COM2 Jumper installed on PM1 only w/22AWG wire.
