

# ACIS Verification Summary Report

36-01510.055

**Specification:** ACIS Contract End Item Specification

**Requirement Number/Title:** 3.2.1 Performance (VRSD 3.2.1f)

**Requirement Statement:** System noise measured for each CCD shall not exceed 4 electrons RMS.

**Verification Method:** Measurement

**Procedure Number:**

**Configuration:**

**Cycle Time:**

**Verification Discussion/Results:**

29 May 1997

Date

ACIS Cognizant Engineer

**ACIS Verification Summary Report** (Continued)

Results of noise measurements for each CCD are tabulated in ACIS memo PS-131; 25 April 1997, by M. Bautz. Noise measurement procedures are described in ACIS memo PS-65, 2 February 1995, by M. Bautz.
