

ACIS Verification Summary Report

Specification:	ACIS Contract End Item Specification
Requirement Number/Title:	3.3.3.1.2.1 Connectors (VRSD 3.3.3.1.2.1-1)
Requirement Statement: Connectors shall be in accordance with the MIT Product Assurance and Safety Plan, Section 2.	
Verification Method:	Inspection and Validation of Records
Procedure Number:	
Configuration:	
Cycle Time:	
Verification Discussion/Results:	
<p>ACIS connectors were selected from the list of approved connectors in MIL-STD-975. Where standard connectors were not appropriate, Nonstandard Part Approval Requests (NSPARs) were submitted to and approved by MSFC. Fabrication drawings, parts lists, the Assembly Work Orders (travelers), and the Approved EEE Parts List (SPA02) identify the approved connectors for flight hardware fabrication. In-process inspection, final inspection, and post fabrication data confirm that <u>only</u> approved connectors are used in ACIS flight hardware.</p>
