# **CRaTER**

## **Heritage Hardware Report**

Dwg. No. 32-04013

Revision A

May 10, 2006

CRAaTER is a Radiation Measurement Instrument that will be flown on the Lunar Reconnaissance Orbiter (LRO). It is a totally new and unique design, using proven parts, materials, and technologies. None of the assemblies are off-the-shelf or borrowed from other programs or previous designs. As such, there are no items to report as Heritage Hardware.

The Heritage Hardware Report is Contract Data Requirements List, item number 1,
