

# CRaTER Malfunction Report

**Test Title: EMC Environments**

**Verification Ref: 32-06050.0304**

**Malfunction Report No: \_\_\_\_\_**

Reference: 32-06006.01 Rev A, EMC Test Procedure/Plan  
Requirement: RE02

Procedure: 32-06006.02, Parker/Chomerics Test Procedure

## Malfunction Description:

Emissions exceeded limits by +20db at various discrete frequencies 6MHz to 60MHz in both horizontal and vertical polarizations.

NB the data package shows the (much greater) exceedances on the unmodified SN2, as well as the re-run of this test with SN1 having been modified with ECO 32-253 to remove wiring originally used to monitor the input power lines.
