

# MST-0425

MWA clock unit

## Test: Short test

Serial number: 003  
Tester: C.D.  
Date: 10/12/2010

## Test procedure

- Verify no shorts across power inputs
- Record resistance for future reference 96 k $\Omega$

## Comments

On Power up this unit draw in excess of 3 AMPS FROM A 3AMP SUPPLY. WE THEN USED A 6 AMP SUPPLY AND IT DREW ABOUT 3.5 AMPS THEN IT STARTED DRAWING 1.6 AMPS. IT NOW DRAWS 1.6 AMPS CONSTANTLY ON POWER UP NOW.
